Contribution Suite

Multi-contribution system for streaming data

Globally, financial institutions, data vendors and online portals rely on data covering Forex, OTCs, derivatives, funds, grey market instruments, etc for internal operations and external communication. Issuers of such instruments need to offer reliable ways to publish up-to-date information.

Interactive DataSM provides Contribution Suite, a multi-contribution system for streaming data. It allows issuers to efficiently disseminate data while retaining full control over the recipients, formats and billing of content.

■ Feed Enhancements

Incoming data (i.e. feeds, ftp files, XML) can be imported automatically into Contribution Suite, processed into standardized formats and exported in various vendor protocols.

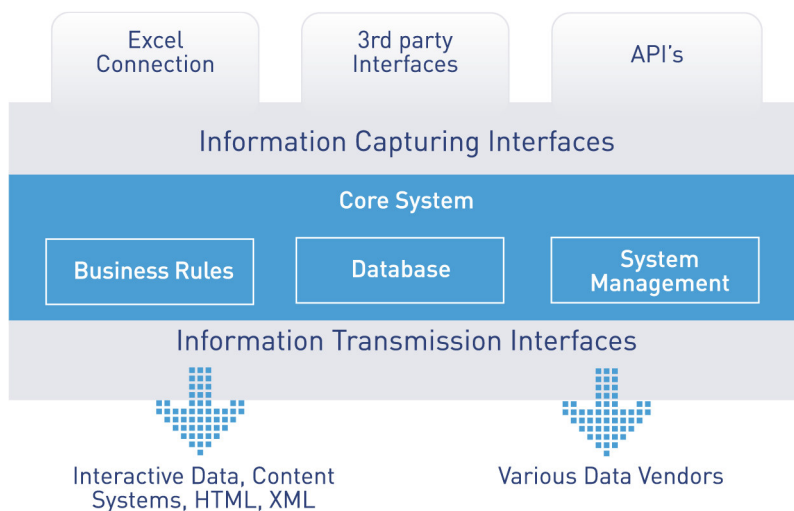

Contribution Suite can help to:

- Aggregate and consolidate data from various sources into a standardized feed format.

- Enhance pages and quote lists by integrating selected data
- Chain feed data for continuous updates
- automatically update distributed data items within pages, records or chains
- Simultaneously transmit data to several recipients via parallel lines

■ Full Distribution Control

Using Contribution Suite, data can be exported to Interactive Data Managed Solutions' market data platform (Market Data Gateway) and various other systems. These include Internet, intranet and extranet solutions as well as exchanges and software applications. Recipient needs can be addressed by the setting of performance rates in addition to content and output.

Contribution Suite from Interactive Data is the multi-contribution system to distribute financial data

■ Optimize Communication Infrastructures

Contribution Suite can help to meet customers' needs more effectively by standardizing communication processes to increase efficiency, improve distribution and enhance speed. Contribution Suite's standard interfaces and included support tools substantially reduce time and effort to administrate communication and contents as various vendor formats are standardized into one format that can be accessed via multiple interfaces.

■ Benefits

- Run your own market data feed distribution and deliver vendors and recipients with targeted data streams.
- Determine the volume, update rate, format and recipients of your distributed data.
- Distribution of up to 6,000 ticks per second of quote data with a powerful scalable system.
- Provide market data feeds to major inter-bank vendors.
- Deliver data to Internet, intranet or extranet solutions in HTML, XML or customized formats.
- Target more than 150 renowned financial service providers from Interactive Data's' customer.

About Interactive Data Corporation

Interactive Data Corporation is a trusted leader in financial information. Thousands of financial institutions and active traders, as well as hundreds of software and service providers, subscribe to our fixed income evaluations, reference data, real-time market data, trading infrastructure services, fixed income analytics, desktop solutions and web-based solutions.
